

FINAL PROJECT

Python Application Project

Raymond Tsang

PROJECT REQUIREMENT

- Flask (db, template engine, structure, etc) (30%)
- Bootstrap (RWD, Bootstrap features, Bootstrap layout, etc) (10%)
- UI (HTML, space, color, media, animation, etc) (10%)
- UX (form, Interaction, logic flow, etc) (20%)
- Presentation (ppt, presentation) (10%)
- Extra Python features (Compute vision, Chatbot, web crawling, QR Code, Login, encrypt password, Flask Blueprint, Generate chart, etc) (20%)

TEAM

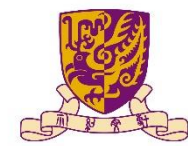

- Recommend 2 people in a group.
 - One will handle Python Flask backend.
 - Another one will handle Frontend, PowerPoint.
- Both group members will do the presentation together.

PRESENTATION

- 10 minutes for each group.
 - 5min for PowerPoint presentation.
 - 5min for live demonstration.
- You need to bring your own notebook to run your project for demonstration. We will open zoom. Then you join the zoom link in class to share your presentation to the whole class.
